Mixed addition / subtraction (within 100)

Grade 2 Word Problems Worksheet

Ashley, Bob and Clara are keeping score of the game they are playing. When a player wins a game, that player gets 5 points. If a player loses a game, the player has 3 points taken away. If it is a tie, every player gets 2 points.

1. Each of them has 20 points to start with. How many points do they have in total?
2. Ashley wins the first game. How many points does Ashley have after the first game?
3. Bob wins the second game. How many points does Bob have after the second game?
(Hint: remember to count the points Bob gets for the first game!)

Multi-Step Word Problems

1. Sandra read 5 books, Deven read 6 books and Breanna read 7 books. One book was read by all three children, but every other book was different. How many different books did the children read?
2. In Science class, Sara needed 8 test tubes for 3 different experiments. The first experiment required 2 test tubes and the other two experiments required the same number of test tubes. How many test tubes were needed for each of the other two experiments?
3. Braxton and his sister Beatrice combined their allowances of \$7 each, so they could buy a movie for \$12. They bought 5 containers of fruit salad with the remaining money and split the containers evenly between them. How many containers of fruit salad did they each get?
4. Before Cam broke his right arm, he was able to type 9 words per minute on his phone. After he broke his arm, he had to use his left hand for a while, and he could only type 6 words per minute. What is the difference between the number of words he could type in 5 minutes before and after he broke his arm?
5. When Giselle decided to stop eating junk food, she started saving more of her allowance to buy a larger bicycle. She managed to put away \$6 every week for 8 weeks and found a nice used bicycle for \$50. She thought that the best deal in that amount in her savings jar. Did she have exactly enough for the bicycle? If not, how much extra or how much less did she have?
6. Annie and Dustin took a beginner's programming course over several weekends that showed them how to make simple video games. They spent most of their waking hours engaged in programming tasks and ended up with a game they called "No-Beats-Git". How many hours do you think they spent on their course? Show your work.

Story Problems

Directions: Read and solve the story problems. Write an addition or subtraction equation.

<p>Charm City Zoo has 34 zebras. 12 of these zebras are boys. How many zebras are girls?</p> <p>_____ = _____</p>	<p>There were 82 penguins outside. When it started to rain, 39 penguins went inside. How many penguins are still outside?</p> <p>_____ = _____</p>
<p>The Crocodile Rescue had 46 crocodiles. They rescued 37 more from a zoo. How many crocodiles do they have now?</p> <p>_____ = _____</p>	<p>The sanctuary has African and Indian elephants. There are 92 elephants total. 56 are African elephants. The rest are Indian. How many Indian elephants are there?</p> <p>_____ = _____</p>
<p>The reptile house has room for 33 lizards. They have 16 lizards. How many more lizards do they have room for?</p> <p>_____ = _____</p>	<p>There were 38 flamingos in a pond. Then, 14 more flamingos joined them. How many flamingos are there now?</p> <p>_____ = _____</p>

Name: _____

Addition, Subtraction, Multiplication, & Division with Decimals: Mixed

Solve the word problems. Please show all of your work. Use labels in your answers.

1. You are talking to your boyfriend/girlfriend who is overseas, and it costs you \$.35 for your first text message, and \$.08 for each additional text. If you have \$.75 cents, how many times can you text?
2. You bought 5 pounds of ground hamburger meat. You want to make quarter pounders (that each weigh .25 of a pound). How many quarter pounders can you make?
3. You are trying to make curtains for your little sister's dollhouse. There are 24 windows on the dollhouse and each window needs 3.75 inches of fabric for curtains. How much fabric do you need?

Your sister would also like little tiny pillows for her dolls. If you have 8 feet of fabric in all (there are 12 inches in a foot), how much do you have leftover for pillows?

4. You are dying for brownies. Your brownie recipe calls for 2.5 cups of sugar. You have 1.75 cups of sugar in your cabinet. How much more sugar do you need?

Your neighbor can lend you 2 cups of sugar. Now, how much extra sugar do you have?

Remove your tagalongs or your thin crate mints and find out how many remains you can eat! girl scout scout cookie divisions the worksheets in this section are made up of history problems by oating the division and involving remains. This is a very common class of word problems and a specific practice with these worksheets will prepare students when they find similar problems in standardized testing. Problems of travel time words (usual) wondering when the train arrives? And if you need help, see the word trouble tricks at the bottom of this page! these introductory words problems for your addition are perfect for applied first degree or second grade mathematics. this page has a large collection of word problems that provide a smooth introduction to word problems for the four basic mathematical operations. These worksheets require students to differentiate between the writing of a history problem that requires multiplication verse one that requires division to reach the answer. these workshops mix problems of addition, subtraction, multiplication and word division. problems of the word of the fraction arbalap arbalap ed amelborp nu reah ed amrof adalczem n'Aicarepo ed sarbalap ed samelborP .airotsih al ed amelborp led otzet led n'Aicunf ne atcerroc n'Aicarepo al rigele ed dadicpac al setnaidutse sol a n;Araulave ojabart ed sajoj satsE .sotxim sorem^An y adaucedani n'Aicarf ,adauceda n'Aicarf more complex is to include extra (but unused) information in the problem text. These worksheets are primarily division word problems that introduce remainders. Paper clips, checkers or other handy objects can stand in place of the problem's subject, and this provides an opportunity to work up other simple examples with different numbers. (15 Worksheets) Multiplying Fractions Word Problems Worksheets This set of printables is for the ardently active children! Explore the application of fraction multiplication and mixed-number multiplication in the real world with this exhilarating practice set. Talking with kids regularly about 'how many more do you need' or 'how many do you have left over' or other seemingly simple questions when asked regularly can build that basic number sense that helps enormously when word problems and applied math start to show up. There are many tricks for solving word problems that can bridge the gap, and they can be helpful tools if students are either struggling with where to start with a problem or just need a way to check their thinking on a particular problem. Make sure your student reads the entire problem first. These worksheets include only multiplication story problems; see worksheets in the following sections for mixed operations. Multiplication Word Problems These division story problems deal with only whole divisions (quotients without remainders.) This is a great first step to recognizing the keywords that signal you are solving a division word problem. Division Word Problems! you've been working as Troop Cookie Mom (or Dad!) you'll know what kind of math we've been practicing... If students can draw a picture of the problem (even using simple representations like squares or circles for the units discussed in the problem), then it can help them visualize exactly what's occurring. Another useful visualization strategy is to use manipulatives. These key words aren't a sure-fire way to , Denibmoc' Ekil Sesarhp ,elpmaxe rof:tnioq gnittrats lufusva a Eb nac yeht tub ,Melborp a htw od ot tahw
